Reference: FCC Docket Nos 96-45, 98-171, 90-571, 92-237, 99-200, 95-116, 98-170  
and NSD File No. L-00-72.

Dear FCC:

Please don't raise the USF fees. It could hurt me and my family financially. I am against the government wanting to 'tax' telecommunications and wireless communication? Wireless technology is one of the biggest breakthroughs of this epoch, implementing methods to dampen its growth can prove socially and culturally stifling.

This is an uncertain era. Politically and economically. We are at war, we are under constant alert (threat) from terrorists from abroad, as well as within. Our children are killing each other in our high schools. And the U.S. economy gives all of us great cause for concern.

The need for eased communication is greater than ever. Please don't make life more difficult now than it already is. Don't raise the USF fees and make communication accesible only to the wealthy.

Thank you!

Thank you for your prompt attention to this matter. Please provide a written response indicating the status/resolution of this matter.

Very truly yours,

V. Kiperman
